I. OPEN DISASTERS/EMERGENCIES:

II. WEATHER:

Near Term Outlook:

A storm system currently impacting northwestern California will spread precipitation as far south as San Francisco and into the central Sierra through Saturday. Heaviest precipitation will be along the North Coast area, across Trinity and Shasta counties, and into the central Sierra. Snowfall will be confined to areas above 5500', with accumulations generally less than a foot. Dry weather should move in for Sunday into Monday.

Snow Levels:

- * Northern Mountains: at or above 5,000 feet lowering to around 3,000 feet for Shasta by Saturday morning.
- * Central and Southern Sierra: at or above 8,000 feet lowering to 6,000 feet by Saturday morning.
- * Southern Mountains: freezing level remains quite high, above 10,000 feet

Longer Term Outlook:

Looks like the wet pattern will be tapering off a bit by mid-week. Additional rainfall Wednesday through Friday next week look like its on the order of 0.50 - 1.00' for mainly extreme northern California.

California Precipitation Forecast 02/14/14 – 02/21/14**North Coast**

Counties: Del Norte, Humboldt, Mendocino, Lake, Sonoma, Napa

- * Highest amounts are confined to Del Norte and northern Humboldt Counties: **9.00 (-1.0") - 11.00" (-1.0")**
- * Central portions of the region: **1.00 (1.50") - 2.00" (-3.0")**
- * Areas around the North Bay: **0.25 – 1.00"**

Cascade – Sierra

Counties: Siskiyou, Modoc, Trinity, Shasta, Lassen, Plumas, Sierra, Nevada, Placer, El Dorado, Amador, Alpine, Calaveras, Tuolumne, Mariposa

- * Highest amounts confined to mostly western Siskiyou, portions of Trinity County and Mt Shasta: **4.00 – 5.00" (-1.0") - 7.00" (-2.0")**

Bay Area

Counties: Marin, San Francisco, Contra, Costa, Alameda

- * South Bay: **0.05" (-0.20") - 0.25"**
- * Rest of Bay: **0.25" - 0.50"**

Sacramento Valley

Counties: Tehama, Glenn, Butte, Colusa, Sutter, Yuba, Yolo, Sacramento, Solano

- * Northern Sac Valley: **0.25 – 1.25" (-0.25")**
- * Southern Sac Valley: **0.05 - 0.50" (+0.30")**

San Joaquin Valley

Counties: San Joaquin, Stanislaus, Merced, Madera, Fresno, Kings, Tulare, Kern

- * Northern San Joaquin Valley: **0.10 - 0.40" (-0.10")**
- * Southern San Joaquin Valley: **0.00 - 0.10"**

Central Coast

Counties: Santa Cruz, Santa Clara, San Benito, Monterey, San Luis Obispo

*** Precipitation: 0.00 - 0.25" (-0.05")**

South Coast

Counties: Santa Barbara, Ventura, Los Angeles, Orange, San Diego

*** Precipitation: 0.00"**

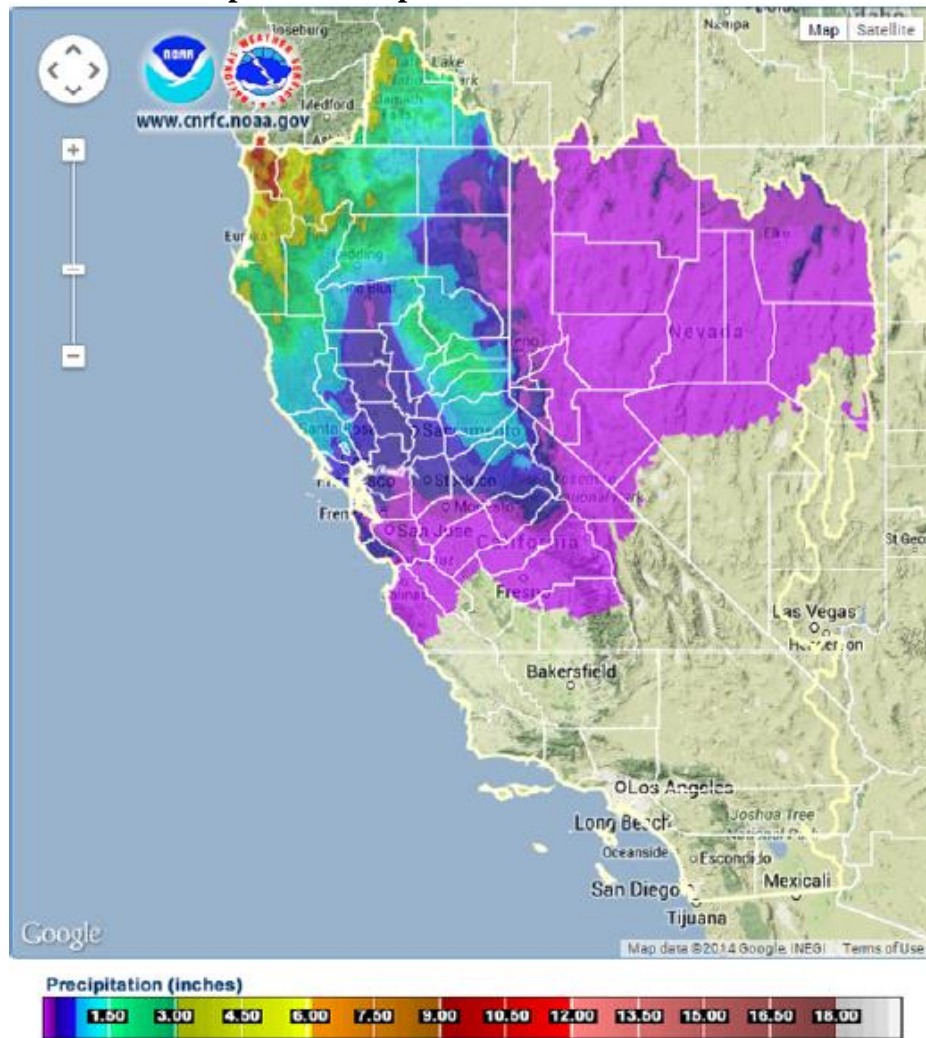

Southeast Interior

Counties: Tuolumne, Mono, Mariposa, Inyo, San Bernardino, Riverside, Imperial

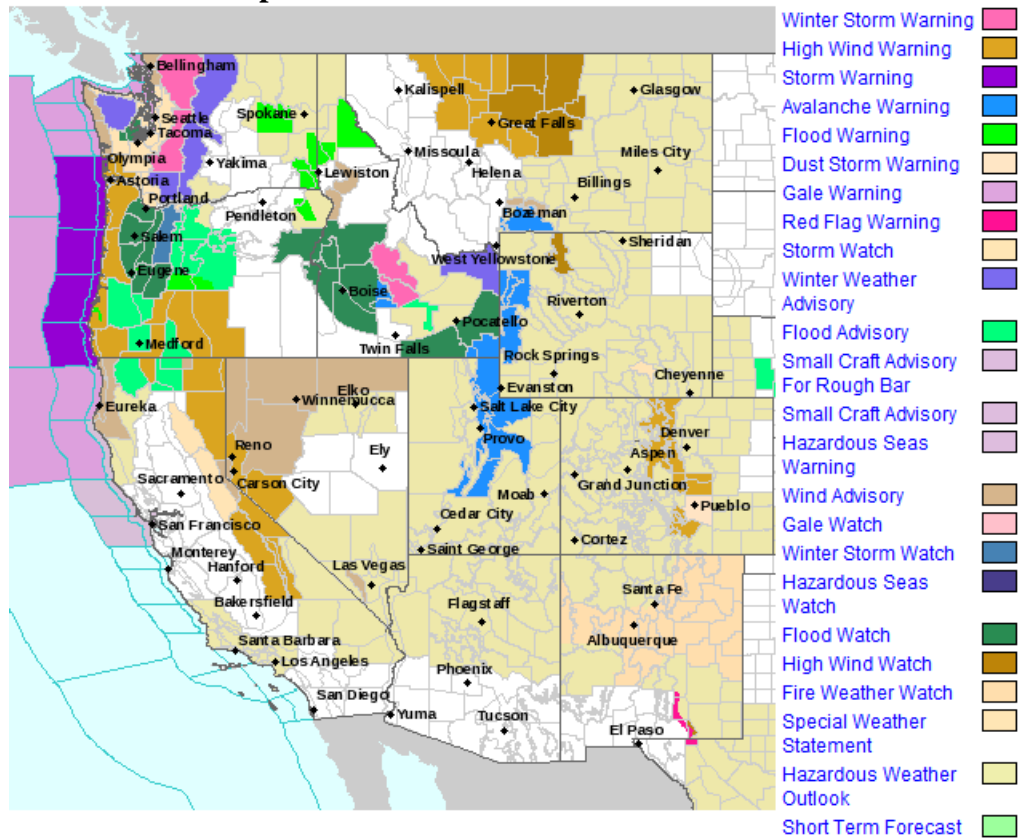

*** Mono County: 0.00 - 0.10"**

*** Rest of the Region: 0.00"**

Northern California

Preparedness Level 1 Multi-Agency Coordination System MACS Mode 2

Southern California

Preparedness Level 2 Multi-Agency Coordination System MACS Mode 2

IV. SIGNIFICANT ACTIVITY:

State

Drought 2014 (Updated)

* The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily. The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed. The Southern REOCs is activated at Level 1.

* The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

* Inland Region - The Drought Coordination and Briefing call for Operational Areas, Indian Tribes and the Governor's Office of Emergency Services Inland Region REOC continues to be held at 1100 hours each Monday. Due to the holiday next week, the regularly scheduled conference call will be held on Wednesday 02/19/2014 at 1100 hours. The Monday at 1100 hours calls will resume thereafter.

Situation:

The lack of winter rain and snowfall has resulted in drought conditions throughout the State. Some local jurisdictions are implementing mandatory conservation orders. The Governor has established a Drought Task Force to oversee and coordinate the response to this event.

The Task Force continues to be in very close contact with local jurisdictions and state agencies to monitor the health of state's water, agriculture, and economy.

** Heavy rain and snow would have to fall throughout California every other day from now until May to reach average annual rain and snowfall. Even with such precipitation, California would remain in drought conditions**

For water conservation tips, visit: <http://saveourh2o.org/>

President Obama Leading Administration-wide Drought Response for California (New)

President Obama on 02/14/2014 announced the following new efforts by the Federal Government in providing drought response for California:

* \$100 million in livestock disaster assistance for California producers - The 2014 Farm Bill contains permanent livestock disaster programs including the Livestock Forage Disaster Program which will help producers in California and other areas recover from the drought. At President Obama's direction, USDA is making implementation of the disaster programs a top priority and plans to have the programs available for sign up in 60 days. Producers will be able to sign up for the livestock disaster programs for losses not only for 2014 but for losses they experienced in 2012 and 2013. While these livestock programs took over a year to get assistance out the door under the last Farm Bill— USDA has committed to cut that time by more than 80 percent and begin sign-up in April. California alone could potentially receive up to \$100 million for 2014 losses and up to \$50 million for previous years.

* \$15 million in targeted conservation assistance for the most extreme and exceptional drought areas - This includes \$5 million in additional assistance to California and \$10 million for drought-impacted areas in Texas, Oklahoma, Nebraska, Colorado and New Mexico. The funding is available through the Environmental Quality Incentives Program (EQIP) administered by USDA. The assistance helps farmers and ranchers implement conservation practices that conserve scarce water resources, reduce wind erosion on drought-impacted fields and improve livestock access to water.

* \$60 million has been made available to food banks in the State of California to help families that may be economically impacted by the drought. The U.S. Department of Agriculture (USDA) is providing help to food banks through The Emergency Food Assistance Program (TEFAP).

* 600 summer meal sites to be established in California's drought stricken areas. The U.S. Department of Agriculture (USDA) is working with the California Department of Education to target efforts to expand the number of Summer Food Service Program meal sites this summer. There are expected to be close to 600 summer meal sites throughout the drought stricken areas.

* \$3 million in Emergency Water Assistance Grants for rural communities experiencing water shortages - U.S. Department of Agriculture (USDA) is making \$3 million in grants available to help rural communities that are experiencing a significant decline in the quality or quantity of drinking water due to the drought obtain or maintain water sources of sufficient quantity and quality. These funds will be provided to eligible, qualified communities by application through USDA-Rural Development's Emergency Community Water Assistance Grants (ECWAG). California state health officials have already identified 17 small community water districts in 10 counties that are at risk of running out of water in 60-120 days. This number is expected to increase if current conditions persist.

* Reducing Federal facilities' water usage: In line with the directive Governor Brown made to state agencies when he declared a drought emergency last month, the President has directed Federal facilities in California to take steps to immediately curb water use, including a moratorium on water usage for new, non-essential landscaping projects and to redouble efforts to fulfill prior commitments to longer-term water use reduction at Federal facilities. This builds on efforts already underway, including the President's call to Federal agencies to improve water use efficiency for

drinking water at Federal facilities across the country by 26 percent and improve water use efficiency for industrial, landscaping, and agricultural water by 20 percent. The Administration is already ahead of schedule towards meeting these goals.

* **Operational Flexibilities:** The President directed the Department of the Interior to work with water contractors and communities to adjust and speed changes to key water projects, and give water contractors flexibility to meet their obligations, as appropriate and while maintaining important environmental safeguards. In addition, NOAA, EPA, the Bureau of Reclamation (BOR) and the Fish and Wildlife Service (FWS) are working daily with their state counterparts to examine possible ways to help alleviate water quality and water supply problems caused or exacerbated by the drought.

* **Investing in climate resilience.** In addition to responding to the immediate drought in California, the President believes that we must do more to help communities across the country become more resilient to the effects of climate change. Recent events have reinforced our knowledge that our communities and economy remain vulnerable to extreme weather and natural hazards. For that reason, the President's 2015 Budget that will be released next month will include a new \$1 billion Climate Resilience Fund. Through this Fund, the President proposes that we:

- * Invest in research and unlock data and information to better understand the projected impacts of climate change and how we can better prepare our communities and infrastructure.
- * Help communities plan and prepare for the impacts of climate change and encourage local measures to reduce future risk.
- * Fund breakthrough technologies and resilient infrastructure that will make us more resilient in the face of changing climate.

***A fact sheet on the new commitments and steps already taken by the Federal Government is attached.**

USDA's Emergency Conservation Program Approved for Drought Assistance (New)

USDA California Farm Service Agency (FSA) State Executive Director Val Dolcini announced Emergency Conservation Program (ECP) availability for multiple counties in California. ECP provides emergency funding and technical assistance to farmers and ranchers to rehabilitate farmland damaged by natural disasters and for implementing emergency water conservation measures in periods of severe drought. The program's initial focus will be to provide assistance to livestock producers with emergency water needs. Interested producers can sign up between February 10 and March 27, 2014. The counties eligible for ECP assistance related to drought include Alameda, Amador, Butte, Calaveras, Colusa, Contra Costa, El Dorado, Fresno, Glenn, Humboldt, Kern, Kings, Lake, Lassen, Los Angeles, Madera, Marin, Mariposa, Mendocino, Merced, Modoc, Monterey, Napa, Orange, Placer, Plumas, Sacramento, San Benito, San Bernardino, San Joaquin, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Stanislaus, Sutter, Tehama, Trinity, Tulare, Tuolumne, Ventura, Yolo, and Yuba.

*** Please see attachment for full news release.**

CURRENT DROUGHT SUMMARY UPDATES:
Emergency Functions

EF1 – EF12
None

OPERATIONAL AREAS

Southern Region

San Diego County

* On Thursday, February 13, San Diego County Water Authority (SDCWA) held a board meeting and approved the Drought Water Level I Matrix Plan (available on the previous San Diego OA Cal EOC entry) and is recommending two items to their 24 member water districts:

1 - Encourage a voluntary 10% water reduction/conservation program

2 - Conduct a public outreach campaign

* The SDCWA will meet again on February 27 (regularly scheduled meeting) for the member water agencies to report back on their plan to support this and their public outreach campaign.

* San Diego County OES is developing a drought concept of operations.

* There is a Unified Disaster County (UDC) meeting on Thursday, February 21, and a drought briefing will be provided to the UDC.

San Luis Obispo County:

* The San Luis Obispo County Drought Task Force will be convening next week as part of developing, among other things a formal presentation on the drought and local response actions to the Board of Supervisors; the Board item is tentatively set for March 4.

* On February 12, 2014, the Atascadero Mutual Water Company, which serves the city of Atascadero and surrounding areas, went from a declaration of a Stage 1 water shortage condition to a Stage 2 water shortage condition. Please see attached document for more information on what measures are taken during stage 2 (pg. 9).

* Due to severe drought conditions, the California Fish and Game Commission adopted, on February 5, 2014 the recommendation of the California Department of Fish and Wildlife to implement emergency regulations that close certain waters to fishing; for San Luis Obispo County this includes all portions of any coastal stream west of any Highway 1 bridge until April 30.

* Related to the previously noted issues in the Paso Robles Groundwater Basin, which draw down is partially contributed to or at the least made worse by the drought, there is a proposal to form a water district in that area. Formation of the district is pending. Related to the formation, an Assembly bill being drafted for introduction in the State Assembly is related specifically to the development of the proposed “Paso Robles Water District” including its governance structure.

* The week of February 10, County OES did pass on to Cal OES, and responded to an inquiry from Cal OES PIO staff about Lady Gaga doing a filming at Hearst Castle. Part of the filming is reported to include filming a public service announcement related to water conservation. Lady Gaga is also paying for a study on a new way to supply the community of Cambria with water; Cambria, located on the coast south of Hearst Castle, is suffering significant water shortages due to the drought. A local media report states that Governor Brown sent Lady Gaga a thank you note for those and other efforts. The filming session has had international media coverage.

- * County OES is still waiting for a response with regard to status and use of state or federal potable water trucks. This is for future planning purposes and is not an immediate need.
- * Some additional impacts are that agriculture growers are impacted not only due to water supplies but because of the salt build up in the soil, which is usually washed out by rain. Without rain, not only are farmers having to irrigate from depleting ground water supplies but must decide what type of crops to plant or to perhaps even not plant at all.

Santa Barbara County:

- * Montecito is implementing 30% reductions.

Ventura County:

- * The Ventura County Board of Supervisors met on February 11, 2014 and received a briefing from County staff and the general managers of major water districts. Direction was given to reduce water usage at County facilities and to continue to monitor the situation and provide updates to the Board.

*** Please see attachment for full Drought Summary (Updated) ***

Declarations/Resolutions/Proclamations: (No Change)

State:

01/17/14 – January 17, 2014, Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for these drought conditions.

* **Counties:** Glenn County, Inyo County, Kern County, Kings County, Madera County, Mendocino County, Santa Barbara County, San Joaquin County, Tulare County, Tuolumne County, Sutter County

* **Cities:** City of Willits in Mendocino County

City of Calistoga in Napa County, St Helena in Napa County

* **Tribes:** Hoopa Valley Tribe in Humboldt County, Yurok Tribe in Del Norte County

* **District/Special District/Other:** Twain Harte Community Services District - Tuolumne County, Brookside Township-Mendocino County, Placer County Water Agency - Placer County

Counties Which Have Established A Drought Task Force (DTF) (No Change)

Northern California:

Measles Outbreak, Contra Costa and Alameda Counties (New)

Contra Costa County:

On February 14, 2014 at 0949 hours the California State Warning Center received a report indicating that there have been two confirmed cases of measles in Contra Costa County.

The Contra Costa Health Services (CCHS) has confirmed two cases of measles in Contra Costa County residents. Both case-patients had history of recent travel to the Philippines prior to illness, and CCHS is identifying many possible exposures in public and community settings associated with these cases. CCHS is coordinating efforts with the City of Berkeley, UC Berkeley (UCB), and California Department of Public Health's Immunization Branch. On 02/13/14, CCHS issued a Health Alert to Bay Area County Health Officers/Communicable Disease (CD) controllers, hospitals, and California Childcare Health Program (CCHP) Advice Nurses. Additionally, BART was notified of a possible exposure and a public announcement of the exposure on BART was made. CCHS is preparing to respond to an increased call volume from the public. CCHS has activated its Infectious Disease Response Plan. Susceptible contacts to the patients are currently under a voluntary quarantine. On-going investigation of contacts is in process.

Alameda County

Alameda County advises that the Public Health DOC is partially activated and responding to a measles contact investigation that involves the Contra Costa UCB measles case. The City of

Berkeley Health Department Operations Center (DOC) was partially activated on 02/14/14 and will remain partially activated through the next operational period (through 02/18/14 at 1300 hours) in response to a measles contact investigation. A press release and measles fact sheet has been posted on the City of Berkeley website. Case contacts are currently being identified.

Currently there are no requests for State Assistance. The Cal OES Regional Representative and California Department of Public Health continue to monitor the situation and will provide updates as warranted.

Residential Explosive Chemicals, Shasta County (Updated)

Current: The evacuation to the 2000' mark has begun. Residents are being asked to evacuate their residences, and be prepared to be gone 5 days. They plan on having the full 2000' cleared by Saturday evening. Sunday is the predicted first weather window. After prepping home to burn hot, if conditions allow, they will set it off. Due to instability of situation, prepping will be done remotely via robots. Numerous agency EOD/bomb squads have been encouraged to send staff for the training and educational aspects for their profession.

After the burn is complete the metal roofing over the entire trailer will need to be removed. This will allow bomb disposal teams to access and sweep trailer remains for any hazards. Air monitoring is being done prior to, during and after the burn to assist with safety assessment of area. Numerous state and local agencies are prepared to test and review information to help mitigate this problem. Once areas are deemed safe and clean residents will be allowed back into their homes. Hopes are that the evacuation circle will be brought in very close after the burn and clearing of hazards. The county is assisting residences with removal of animals as well as livestock from area. In addition, a Cal OES Fire Assistant Chief has been assigned to this incident as an agency rep.

Situation: Cal OES has received a Proclamation of a Local Emergency from Shasta County. Shasta will not request the Governor to declare Shasta County to be in a State of Emergency. The Board of Supervisors will ratify the local emergency Proclamation today. The Emergency is not drought related but pertains to a Sheriff's Department response to an explosion where multiple explosives and chemicals were found in a residential area. The condition is such that **26** homes in a 1000 foot radius have been evacuated and a shelter opened. This may be an extended Shelter Operation as no one will be allowed to return until the contaminated home is destroyed or the threat removed in another manner. The Shasta EOC has not been activated and there are no requests for Mutual Aid at this time. Cal OES LDO, Inland Region assigned ESC and Cal OES IDO continues to monitor the situation.

Southern California:

Los Angeles County I-405 80 Hour Closure (Updated)

Los Angeles transportation officials are conducting an 80-hour northbound I-405 Freeway closure operation in the Sepulveda Pass this Presidents' Day weekend. **Work began on February 14, 2014 at 2200 hours and is scheduled to continue through February 18, 2014 at 0600 hours.** The closure consists of a partial daytime lane reduction and a full nighttime closure of the freeway's northbound lanes between Getty Center Drive and Ventura Boulevard. Approximately 5.6 miles long, the closure equals two-thirds of the length of the entire I-405 Sepulveda Pass Improvements Project. Motorists traveling during the February 14 to 18 weekend were advised to prepare their itineraries in advance, monitor real-time traffic conditions prior to beginning their trips, and follow alternative routes. Caltrans computerized message signs along freeways in neighboring counties and other

metropolitan regions in Southern California informed drivers in advance of the closure. [Both the Los Angeles County and City of Los Angeles emergency operations centers will monitor the closure via their respective duty officers.](#)

CAL OES MISSIONS:

New Missions: NSTR

Ongoing Missions:

2014-Inland-2139 Shasta County is requesting assistance from California Air Resources Board (CARB) to monitor the air and smoke from the destruction of a residence contaminated with numerous hazardous chemicals. After consultation with numerous agencies including the FBI Bomb Squad, it was determined that the whole situation is unstable and unsafe to enter. Only safe means of removing the threat is to burn it in place. This will be determined by weather conditions. Cal OES IDO is coordinating resources.

2014-Inland-2148 Shasta County is requesting assistance from Department of Toxic Substances Control (DTSC) for assistance in mitigating the residual debris left over from the destruction of a home with toxic and explosive chemicals. Currently the plan to destroy by fire is the only way to mitigate this threat. Requirement is for mobile testing of debris to determine toxicity and assist with removal of any toxic materials.

2014-LAW-2163

Current: [Mission anticipated to last until 02/25/14.](#)

Situation: The CNG's 95th CST will assist the Dept. of State's Diplomatic Security Detail with planning and executing Joint Hazard Assessment Team (JHAT) Operations for a foreign dignitary's scheduled appearances.

2014-SOC-2111 Mission is to test the Cascadia Subduction Zone (CSZ) air bridge concept by air transporting 7 passengers from OES and 1 CANG logistics planner on 13 May 2014 from Mather to the State Staging Area (SA) in Redding, to one POD in Del Norte and one POD in Humboldt, to the Redding State SA, and return to Mather. Passengers will discuss actions at the Redding SA and at each OA POD while they are at each location. The air bridge is a critical component to CSZ response and recovery. It is imperative this concept is tested to ensure response teams can be successfully transported into the effected region and the affected Operational Areas' are able to receive aircraft at designated PODs.

2014-LAW-2137

Current: 2/14/14 CNG 95th CST has arrived on scene to coordinate and assist Shasta County SO with this mission.

Situation: Shasta County Sheriff's Office is requesting California National Guard 95th Civil Support Team to assist with an incident within County. Shasta County Sheriff's Office has determined the Region does not have the necessary resource to complete this mission and has formally requested Cal OES for Mutual Aid and the use of the CNG 95th CST's Mobile Lab and Science Officer, Down Range Chemical Remote and/or Manned Monitoring, DOD & CST Medical Officer, Command & Control, decontamination team, Plume Modeling, and Explosive Detection

Kit. The LDO secured the CNG 95th CST to support the Shasta County Sheriff's Office. Cal OES AC Law Branch meeting with Shasta County SO and CNG 95th Civil Support Team personnel today, 2/13/14.

2018-Inland-2118

Current Overnight Population: 1 (No Change)

Situation: Shasta County Sheriff's Office requesting the use of the National Guard Armory in Redding for a shelter for evacuees affected by residential explosion incident in Redding, Shasta County. The American Red Cross Shelter at Manzanita School (1240 Manzanita Hills Ave in Redding relocated to the National Guard Armory located at 3025 South Street in Redding to accommodate the needs of the school which returned to normal sessions. A conference call was held to discuss site security and ADA compliance, present were CNG/California Military Department, Shasta County Sheriff's Office, American Red Cross, Cal OES EDO, LDO and IDO. All items of concern were worked out.

2014-LAW-2109

Current: No new significant information to update at this time.

Situation: On 02/06/14, Shasta County Sheriff's Office (SCSO) responded to a residence due to an explosion outside of city limits of Redding, Shasta County, in a rural setting. Upon investigation, local and Federal Explosive Ordinance Disposal (EOD) teams established a 1000 foot perimeter around the residence due to the amount of explosive and chemical materials within the residence and an outbuilding on the property. Twenty six (26) (+2) homes have been evacuated by SCSO as of 2130 hours on 2/07/14. The evacuation order will remain in effect until a final determination is made regarding the final disposition of the explosives/chemicals within the residence. There has been no law enforcement mutual aid requested for this incident. Shasta County has made a local emergency proclamation and has submitted it to the California State Warning Center. Cal OES LDO is in direct communication with the Shasta County Sheriff's Office regarding this incident and is working with the Inland Duty Officer and Cal OES Regional ESC. Update: 2/9/14 - Shasta County Sheriff's Office is continuing to secure the site and is working with Cal OES regarding CNG assistance. Cal OES LDO is coordinating with Shasta County Sheriffs personnel and is located at the ICP. LDO, ESC Regional Representative and AC Fire Branch attended a meeting which included city, county and state agencies to delineate specific issues and roles in dealing with this incident. A 1,000 foot blast security zone has been secured around the residence. 26 (+2) homes are within this evacuation order with on road closure in effect, Chaparral Drive. Cal OES LDO will continue to coordinate with the Sheriff's Office.

2014-LAW-2069 Solano County Sheriff's Department is requesting California National Guard (CNG) tents to support classes and vendor displays at SAREX 2014 (A joint coordination exercise) scheduled for 9/05-07/2014 in Napa County. Setup of requested resources will begin on 9/04/14 and tear down will occur on 9/08. The exact scope of work will be determined as the planning cycle continues. There will also be a request for communications support which may be a combination of CNG and Cal OES Telecommunications resources. Mission number pulled to allow CNG to begin determining what assets may be available to assist. At this time the specifics of the request are deemed "to be determined" (TBD).

2013-LAW-1797

Current: The search is scheduled to resume on February 18, 2014.

Situation: Butte County has requested this mission re-opened as they will resume the search for a possible homicide victim. The search will resume with assistance from the Alameda County Sheriff's Department who will be providing an underwater Remote Controlled Vessel (ROV) with video and sonar capabilities to search areas of Lake Oroville. Alameda County and Butte County are coordinating mission requirements and will advise on final details regarding deployment of teams to the area.

2014-Coastal-2015 Mendocino County request for a Department of Water Resources (DWR) water specialist to assist in addressing developing issues with water system delivery due to the drought. DWR Drinking Water Program specialist is on scene.

2014-Coastal-2098 Mendocino County, Redwood Valley Water District is in need of two pumps and 6" water pipe due to drought conditions. These pumps will be used to inter tie between Redwood Valley Water District and Capella Water to provide water supplies to the 4,000 people who live in the community. Cal OES CDO is coordinating this resource.

Closed Missions: NSTR

EMAC Colorado

2014-SOC-2101 California is deploying a Recovery specialist, Clyde Muraoka, to Colorado as requested via EMAC #510-RR-2388 to assist in flood recovery operations. The coordination process is complete. Personnel have arrived safely and reported for assignment. The deployment began on 2/09/14 with a confirmed demobilization date of 3/12/14.
